rethinking space.

Belair Kids Furniture The place where dreams come to life

Children like fun, and they love stuff. At Belair, the intent behind our kids furniture is to provide more floor space for activity and more storage for precious things.

In life, most ideas never get so far out of our heads that others hear them. If some do go past our lips, then the chances of putting them to paper are equally as unlikely.

Belair Kids Furniture was birthed as a result of bold people not only sharing their ideas, but being willing to put them to paper and give them life. The offerings you see were not first designed to impress (although they

are often accused of such things) but were created with practical needs in mind. Our hope is that through our fun with ideas - and attention to detail - your children will enjoy their space and create their own dreams.

Belair kids furniture Quality / Warranty / Guarantee

As our furniture line was engineered and built, many team members wanted the first pieces for their own children. We believe when one can take this kind of pride and trust in one's work, the result is satisfaction all around. Your confidence and satisfaction are also desired. Please know we stand behind all our furniture with a no-hassle, 5 year warranty.
